HOW TO READ THIS CATALOGUE

Three levels of detail, so you can go as deep as you need

Every chapter covers one business function. Read the opening page for the overview, scan the skills menu for what fits your team, and use the deep dives to see the results a co-worker delivers.

1

The co-worker

Who they are, what they do and the results they deliver. Start here to find the right fit.

2

The skills menu

Ten specific jobs in every function. Pick one to start, add more as you grow.

3

The deep dives

Two skills per chapter explained: the problem they solve, how the co-worker does the work, and before-and-after results.

CONTENTS

	How every co-worker works Your systems, your rules, your people in charge.	Page 3
	The team at a glance Ten co-workers across six functions.	Page 5
1	**Finance** A finance co-worker that takes the repetitive work out of invoicing, reconciliation, payouts and reporting, so your finance team spends its time on judgment, cash and advice.	Page 6
2	**Customer** Co-workers that answer every call and message, day or night, in your customers' language, and hand over to your team with the full story when a person is needed.	Page 9
3	**Sales and Marketing** Co-workers that respond to every lead in seconds, keep your brand publishing every day and keep your pipeline full of the right prospects, so your people spend their time closing.	Page 12
4	**Operations** A co-worker that keeps your systems, people and customers in step: tracking what is moving, routing what needs doing, chasing what is late and reporting what happened.	Page 15
5	**Risk and Compliance** Co-workers that check everything instead of a sample: every customer call, every review, every tender document. Your specialists then focus on the cases that matter.	Page 18
6	**Executive** A co-worker that gives leaders back their hours: inbox handled, meetings summarised, research done and briefings ready before the day starts.	Page 21
	Getting started The assessment, what we need from you and where to begin.	Page 24

HOW EVERY CO-WORKER WORKS

Your systems, your rules, your people in charge

Every Kydon AI co-worker is built on the same foundations, whichever function it serves. This is what makes them safe to put to work on real business processes.

Works with your stack

Co-workers connect to the systems you already use: accounting, CRM, Microsoft 365, Google Workspace, messaging apps, phone systems and spreadsheets. If a system has an export or an API, we can work with it. No rip and replace.

Your people stay in charge

You decide what each co-worker may do alone, what needs approval and what is off limits. Anyone can pause, correct or override a co-worker at any time.

Controls are built in

Confidence thresholds, approval steps, materiality limits and least-privilege access are set before go-live, not added later.

Every action is recorded

Each co-worker keeps an audit trail of what it did, why, and who approved it. Your auditors and managers can see the full history.

Exceptions go to people

When a co-worker is unsure, it hands over to a named person with the full context instead of guessing.

Your data stays protected

Co-workers access only what you approve, sensitive data such as card numbers is removed before AI processing, and handling follows the data protection law in each market.

Built on internationally recognised AI governance principles

Our deployments follow seven principles shared by leading national and international AI governance frameworks, so they fit the expectations of regulators in each market where you operate:

Transparency and explainability	Customers are told when they are dealing with a virtual assistant, and every action carries a reason you can review.
Fairness and equity	Rules and scoring are built from your own policies and tested on real cases before go-live.
Security and safety	Least-privilege access, sensitive data removed before AI processing, and staged rollouts.
Human-centricity	Named owners in your team, approval points for actions that matter and exceptions that always go to a person.
Privacy and data governance	Data stays in systems you approve, handled under the data protection law of each market.
Accountability and integrity	A complete audit trail of what each co-worker did, why, and who approved it.
Robustness and reliability	Tested on your past work, run in parallel, then monitored and reported every month.

HOW WE DEPLOY

From first conversation to first shift

Simple co-workers go live in 1 to 2 weeks. Voice, multi-system and multi-site co-workers take 3 to 8 weeks. Every deployment follows the same path.

1. **Assess** · Free AI Workforce Assessment
   We map your workflows and systems, size the opportunity and recommend which co-worker to start with.
2. **Design** · Week 1
   We agree the role, the rules, the approvals and the systems it connects to, using your own scripts and data.
3. **Build and test** · Weeks 1 to 6
   We build the co-worker and test it on your real past calls, emails, invoices or documents.
4. **Parallel run** · One cycle
   The co-worker runs alongside your current process, so you can compare results before switching over.
5. **Go live** · Staged
   Switched on in stages, starting where risk is lowest, such as after-hours calls or one entity.
6. **Run and improve** · Every month
   We monitor, tune and report every month, and train your team to supervise and get more from it.

THE KYDON DIFFERENCE

AI co-workers, plus people who can run them

Every deployment is backed by AI operators trained through the AI Workforce Factory and Future Edge Institute.

Your team learns alongside

We train your staff to supervise, correct and improve each co-worker. Learning is in Kydon's DNA.

Local and accountable

One Kydon contact for your market, backed by teams across Asia and responsible for results.

Built on proven delivery

Our co-workers are built on patterns proven across hundreds of automation and AI deployments.

CHAPTER 1

Finance

A finance co-worker that takes the repetitive work out of invoicing, reconciliation, payouts and reporting, so your finance team spends its time on judgment, cash and advice.

MEET THE CO-WORKERS

Farah

AI Finance Assistant

Runs the daily finance routine: invoices out on time, payments matched, ledgers reconciled, reports ready before anyone asks.

For SME finance teams, CFOs and controllers of growing companies, and accounting and corporate service firms.

WHAT THIS CHAPTER'S CO-WORKER DELIVERS

22 h to 6 h
monthly reconciliation effort

4 to 1.5 days
to close the month

12.5 h
of re-keying removed every week

WHO BUYS THIS

CFOs and finance managers of companies with 20 to 500 staff, controllers in multi-entity and multi-country groups, and accounting firms that want to serve more clients without adding headcount. Farah fits teams that already use an accounting system such as Xero, QuickBooks, Zoho Books, SAP Business One, Microsoft Dynamics or NetSuite, and still move data between it, the bank, spreadsheets and email by hand.

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

CHAPTER 1 · SKILLS MENU

What the finance co-worker can take on

Each skill can be switched on by itself or combined. Most clients start with one or two, prove the result over a month-end, then add more.

Invoice dispatch — Farah

Builds each invoice from your billing records the moment it is raised, emails it with the right attachments and logs that it was sent.

5 to 10 hours of weekly email work removed; live in 1 week

Bank and ledger reconciliation — Farah

Reads bank statements, cleans the ledger and matches transactions, including partial and fuzzy matches, then hands you only the exceptions.

22 hours down to 6 a month

Payment matching and AR sync — Farah

Links every incoming payment to its invoice and keeps receivables in your reporting database current, with no duplicates.

12.5 hours of weekly re-keying removed

Collections follow-up — Farah

Sends polite, escalating reminders on overdue invoices on a schedule you set, and flags accounts that need a call from a person.

Payment cycles up to 30% faster

Bulk payouts — Farah

Validates and sends hundreds or thousands of payouts in one run, with a full audit trail and payee notifications.

3,000+ payouts per run; 20 hours to 1 a week

Month-end close pack — Farah

Pulls balances, reconciliations and schedules into a standard close checklist and pack, with open items highlighted.

Close cut from 4 days to 1.5

13-week cash flow forecast — Farah

Builds and rolls a weekly cash forecast from receivables, payables and known commitments, with scenarios you can switch.

Hours of spreadsheet work cut to minutes

Budget versus actual commentary — Farah

Tracks KPIs against budget, explains the biggest variances in plain language and alerts you when a line moves out of range.

Monthly commentary drafted for review

Financial models — Farah

Drafts three-statement models, revenue and headcount plans and valuation models in Excel, with assumptions documented for review.

A 2 to 3 hour build cut to about 15 minutes

Ask your numbers — Farah

Answers questions such as "which customers are 60 days overdue?" in chat, showing the data she used and declining when she is not sure.

Answers in seconds, with sources

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

DEEP DIVE · FARAH · AI FINANCE ASSISTANT

Bank and ledger reconciliation

Farah does the matching work of reconciliation every day, so month-end becomes a review of a short exception list instead of days of ticking and tying.

THE PROBLEM TODAY

22 h
a month spent matching transactions by hand

4 days
to close the month

Late
errors found only at audit or close

HOW FARAH DOES IT

1. Collect the statements
2. Validate the data
3. Prepare the ledger
4. Match
5. Score every match
6. Route the exceptions
7. Post and report

BEFORE AND AFTER	BEFORE	WITH FARAH
Monthly reconciliation effort	22 hours	**6 hours**
Days to close	4	**1.5**
Time reviewing exceptions	Every line checked	**80% less**
Accuracy on clear matches	Varies by person	**95%+**

DEEP DIVE · FARAH · AI FINANCE ASSISTANT

Invoice to cash

From the moment a sale is billed to the moment the cash is matched, Farah keeps every invoice moving: sent on time, chased politely, matched when paid and visible in your reports.

THE PROBLEM TODAY

5 to 10 h
a week composing invoice emails

250+
invoices and payments re-keyed weekly

Days
before overdue accounts are noticed

HOW FARAH DOES IT

1. Invoice raised
2. Invoice sent
3. Payment received
4. Records synced
5. Reminders sent
6. Escalate

BEFORE AND AFTER	BEFORE	WITH FARAH
Invoice email effort	5 to 10 hours a week	**Near zero**
Manual re-keying	12.5 hours a week	**Removed**
Invoice delivery	Batched, often days late	**Within seconds**
Payment cycle	Baseline	**Up to 30% faster**

CHAPTER 2

Customer

Co-workers that answer every call and message, day or night, in your customers' language, and hand over to your team with the full story when a person is needed.

MEET THE CO-WORKERS

Rina

AI Receptionist

Answers every call on the first ring, books appointments into your live calendar and confirms before the caller hangs up.

For clinics, dental and aesthetic practices, law firms, salons, hotels and home-services businesses.

Liam

AI Customer Care Officer

Answers customers on messaging apps and web chat from your own products, FAQs and policies, remembers every past conversation and keeps orders in sync.

For online retailers, service businesses, education providers and any team flooded with repeat questions.

WHAT THIS CHAPTER'S CO-WORKERS DELIVER

40%
more bookings captured with 24/7 answering

70%
lower support costs on messaging

10x
conversations handled at once

WHO BUYS THIS

Operations heads, practice managers and customer service leads who are losing calls after hours, leaving customers on hold at peak times, or hiring more agents to answer the same questions. Rina and Liam work alongside your front desk and service team; they take the routine volume and pass on anything that needs a person.

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

Contact Kydon Systems
kydongrp.com · contact@kydongrp.com

CHAPTER 2 · SKILLS MENU

What the customer co-workers can take on

Rina covers the phone; Liam covers messaging. Both share one knowledge base, so a customer gets the same answer whichever channel they use.

24/7 call answering — Rina

Picks up every inbound call instantly, understands what the caller needs and resolves or routes it, with no hold queue.

95% shorter wait times

Appointment booking — Rina

Checks your live calendar during the call, offers open slots that fit your rules and confirms the booking before the call ends.

40% more bookings; zero double bookings

Case status and logging — Rina

Tells callers where their request or repair stands, and opens a new case in your system when needed.

Routine status calls handled end to end

Voice, chat and SMS as one assistant — Rina

One assistant across inbound calls, outbound calls, web chat and SMS, sharing one knowledge base and one customer record.

Zero manual CRM entry per touchpoint

Messaging app support — Liam

Answers messages on WhatsApp, LINE, WeChat and the other apps your customers use, from your catalogue, FAQs and policies, and remembers each customer's earlier conversations.

70% lower support costs; 85%+ accuracy on company data

Order status and updates — Liam

Answers "where is my order?" from live order data and keeps products, orders and customers in sync between store and back office.

90% less order data entry

Shared team inbox — Liam

Lets your whole team work every messaging channel from one shared dashboard, assigning chats and searching history, with nothing lost if the connection drops.

Zero missed messages

Multilingual replies — Liam

Translates customer text and voice notes into your team's language and replies in the customer's, in seconds.

80% less translation time

Review responses — Liam

Checks every outlet's online reviews every few hours, replies in your approved voice and routes low ratings to the outlet manager.

Replies within 4 hours; zero missed reviews

Human handover — Rina and Liam

Passes any conversation to a named person with the full transcript and customer history, so nobody has to repeat themselves.

Your team only handles what needs them

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

Contact Kydon Systems
kydongrp.com · contact@kydongrp.com

DEEP DIVE · RINA · AI RECEPTIONIST

Calls answered and booked, around the clock

Rina answers every call the moment it rings, books the right appointment against your live calendar and sends your staff a summary, whether it is 2pm on a Tuesday or 11pm on a Sunday.

THE PROBLEM TODAY

30 to 40%
of bookings lost to missed and abandoned calls

After hours
when many customers try to call

Double
bookings when calendars are updated by hand

HOW RINA DOES IT

1. Answer
2. Understand
3. Check availability
4. Offer and book
5. Confirm
6. Summarise

BEFORE AND AFTER	BEFORE	WITH RINA
Bookings captured	Baseline	**40% more**
Customer wait time	Hold queues at peaks	**95% shorter**
Missed off-hours calls	Most go unanswered	**80% fewer**
Double bookings	Occasional	**Zero**

DEEP DIVE · LIAM · AI CUSTOMER CARE OFFICER

Messaging support that remembers

Liam answers your customers on the messaging apps they already use, from your own knowledge, remembers every conversation and hands anything tricky to your team in a shared inbox, so customers get instant, accurate answers at any hour.

THE PROBLEM TODAY

30 to 40 h
a week answering repeat questions

Hours
before many messages get a reply

Wrong
answers from generic chatbots

HOW LIAM DOES IT

1. Message arrives
2. Recall the customer
3. Answer from your knowledge
4. Act
5. Hand over when needed
6. Log and learn

BEFORE AND AFTER	BEFORE	WITH LIAM
Support cost	Baseline	**70% lower**
Manual support hours	40 a week	**8 a week**
Response time	Minutes to hours	**Instant**
Conversations at once	One per agent	**10x more**

CHAPTER 3

Sales and Marketing

Co-workers that respond to every lead in seconds, keep your brand publishing every day and keep your pipeline full of the right prospects, so your people spend their time closing.

MEET THE CO-WORKERS

Sanjay

AI Sales Development Associate

Calls or messages every new enquiry within seconds, qualifies it, books the meeting and follows up until it is won or closed.

For sales directors, B2B founders, real estate agencies and education providers.

Mei

AI Marketing and Content Executive

Researches, writes and publishes articles and social posts across every channel, in your brand voice, with your approval.

For marketing managers at SMEs, brands and professional firms.

Tara

AI Talent and Market Researcher

Tracks who is hiring and buying in your market, enriches prospect and candidate profiles, and keeps your outreach lists fresh.

For recruitment agencies, HR teams and business development teams.

WHAT THIS CHAPTER'S CO-WORKERS DELIVER

95%
faster speed to first contact

10x
blog output with the same team

500+
profiles researched and enriched each week

WHO BUYS THIS

Sales and marketing leaders who know leads are going cold, content is not going out consistently, or reps spend more time researching and typing into the CRM than talking to customers. These co-workers handle the volume and the admin; your team handles the relationships.

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

Contact Kydon Systems
kydongrp.com · contact@kydongrp.com

CHAPTER 3 · SKILLS MENU

What the sales and marketing co-workers can take on

Sanjay works the pipeline, Mei fills it with content and Tara supplies the research. Each can be deployed alone or as a connected team.

Speed-to-lead calling — Sanjay

Calls each new web or ads enquiry within 30 seconds to 5 minutes and holds a natural qualifying conversation.

4x more qualified leads

Qualification and booking — Sanjay

Qualifies on budget, authority, need and timing, books the meeting into a rep's calendar and sends a confirmation.

80% less time on qualifying calls

Chat and DM qualification — Sanjay

Screens social media, messaging app and website conversations in real time and passes qualified prospects to your team.

200+ prospects screened a day

Lead capture to CRM — Sanjay

Reads enquiry emails and form submissions, checks for duplicates and creates complete contacts, companies and deals.

100% lead capture; CRM entry 20 h to 1 h a week

Follow-up and nurture — Sanjay

Runs personalised email, SMS and messaging follow-up sequences based on what each prospect said, with delivery tracking.

35% higher conversion

Renewal reminders — Sanjay

Sends timed renewal reminders, skips auto-renewals and offers alternatives for discontinued products.

20% more renewals captured

Content engine — Mei

Researches topics, drafts articles and platform-specific posts with matching images, and publishes on approval.

90% less content creation time

SEO articles at scale — Mei

Turns a keyword list into structured, optimised articles published straight to your website.

3 to 30+ posts a week

Content repurposing — Mei

Turns webinars, videos and meeting notes into summaries, social posts, newsletters and a 30-day posting plan.

15 hours to 90 minutes a week

Market and talent research — Tara

Monitors job postings and company signals, enriches prospect and candidate profiles and keeps outreach lists clean and de-duplicated.

90% less manual research; 50 to 500+ profiles a week

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

kydongrp.com · contact@kydongrp.com

DEEP DIVE · SANJAY · AI SALES DEVELOPMENT ASSOCIATE

Speed to lead

Sanjay contacts every new enquiry within seconds, qualifies it in a natural conversation, books the meeting and runs the follow-up, so no lead goes cold waiting for a rep.

THE PROBLEM TODAY

40 to 50%	Hours	Patchy
of leads lost to slow response	or days before first contact	CRM notes and generic follow-ups

HOW SANJAY DOES IT

1. Lead arrives
2. Compliance check
3. Contact within seconds
4. Qualify
5. Book or route
6. Follow up
7. Update the CRM

BEFORE AND AFTER	BEFORE	WITH SANJAY
Speed to first contact	Hours or days	**Under 30 seconds to 5 minutes**
Opportunities captured	Baseline	**50% more**
Conversion from qualified leads	Baseline	**35% higher**
Manual follow-up effort	Every call and email by hand	**90% less**

DEEP DIVE · MEI · AI MARKETING AND CONTENT EXECUTIVE

An always-on content engine

Mei researches, writes, designs and publishes your content across every channel on schedule, in your brand voice, with a person approving before anything goes live.

THE PROBLEM TODAY

25+ h	Gaps	Missed
a week on content production	when the team is busy or away	trending topics in your industry

HOW MEI DOES IT

1. Pick the topic
2. Research
3. Draft for each channel
4. Create visuals
5. You approve
6. Publish and track

BEFORE AND AFTER	BEFORE	WITH MEI
Content creation time	Baseline	**90% less**
Blog output	3 posts a week	**30+ a week**
Posting consistency	Irregular	**Every day, every channel**
Time to publish a finished post	Hours	**15 seconds**

CHAPTER 4

Operations

A co-worker that keeps your systems, people and customers in step: tracking what is moving, routing what needs doing, chasing what is late and reporting what happened.

MEET THE CO-WORKERS

Tom

AI Operations Coordinator

Tracks shipments and jobs, routes requests to the right team, chases overdue tasks and keeps every system and dashboard current.

For COOs and operations managers in logistics, facilities, field services, property and multi-site businesses.

WHAT THIS CHAPTER'S CO-WORKER DELIVERS

15 h to 16 min
weekly shipment tracking work

70%
faster service request response

80%
fewer missed deadlines

WHO BUYS THIS

Operations leaders whose teams spend their day copying updates between systems, chasing people for status and building the same reports every week. Tom fits businesses running on a mix of spreadsheets, a work-management tool, email and messaging apps, including teams already on Microsoft 365 or Google Workspace.

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

Contact Kydon Systems
kydongrp.com · contact@kydongrp.com

CHAPTER 4 · SKILLS MENU

What the operations co-worker can take on

Tom connects the tools you already run on. Each skill removes a recurring manual hand-off between systems or people.

Shipment and job tracking — Tom

Pulls container, vessel and delivery status from carrier and port data, updates your board and notifies customers automatically.

15 hours to 16 minutes a week

Service request routing — Tom

Takes requests from a simple portal, routes them to the right team, tracks approvals and keeps requesters updated.

70% faster response; zero lost requests

Task chasing — Tom

Assigns tasks by department, detects overdue items and sends reminders and escalations on Teams or the messaging apps your people already use.

80% fewer missed deadlines

System-to-system sync — Tom

Keeps records consistent between your CRM, work boards, spreadsheets and email tools within a minute of any change.

Errors from 20% to under 1%

Performance dashboards — Tom

Combines data from calling, ticketing and sales tools into one daily-refreshed dashboard, attributed to the right person.

One source of truth, no manual exports

Workforce scheduling — Tom

Matches jobs to available staff, confirms shifts in one click and escalates when someone does not respond.

3-tier automatic escalation

Document and image capture — Tom

Reads delivery orders, receipts, forms and photos, in multiple languages, and turns them into clean data in your systems.

10 seconds per image instead of minutes

Bulk personalised communications — Tom

Sends hundreds of personalised emails, each with the right attachments, straight from a spreadsheet, with duplicates prevented.

Live in 1 week

Guest and visitor access — Tom

Registers guests once, issues QR codes or NFC passes and logs every check-in in real time.

3-second checkpoint clearance

Routine reports — Tom

Builds and sends your daily and weekly operational reports on schedule, with exceptions highlighted.

Hours of weekly reporting removed

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

DEEP DIVE · TOM · AI OPERATIONS COORDINATOR

Shipment tracking and customer updates

Tom watches every container and delivery for you, updates your operations board the moment something changes and tells your customers before they have to ask.

THE PROBLEM TODAY

15 h	Late	Errors
a week checking and updating statuses	delay notices to customers	from manual copying

HOW TOM DOES IT

1. Watch every shipment
2. Detect changes
3. Update your board
4. Notify customers
5. Flag risks
6. Report

BEFORE AND AFTER	BEFORE	WITH TOM
Weekly tracking work	15 hours	**16 minutes**
Customer notifications	Manual, often late	**Automatic, real time**
Data-entry errors	Regular	**Zero**
Staff time freed	Baseline	**About 700 hours a year**

DEEP DIVE · TOM · AI OPERATIONS COORDINATOR

Service requests, routed and resolved

Tom gives your organisation one simple way to ask for help, sends every request to the right team, chases approvals and keeps everyone informed until it is closed.

THE PROBLEM TODAY

Days	Lost	Chasing
to respond to routine requests	requests with no audit trail	approvals and status by hand

HOW TOM DOES IT

1. Request submitted
2. Classify and route
3. Approve
4. Assign
5. Keep people informed
6. Close and report

BEFORE AND AFTER	BEFORE	WITH TOM
Average response time	Days	**Hours, 70% faster**
Lost or forgotten requests	Regular	**Zero**
Status chasing	Constant	**Automatic updates**
Extra software licences	Often needed	**None when built on Microsoft 365**

© 2026 Kydon Systems. All rights reserved. AI Workforce Factory™ and the AI co-worker personas are trademarks and intellectual property of Kydon Systems. Results shown are typical outcomes; see Important information on page 24. Version 1.2.

CHAPTER 5

Risk and Compliance

Co-workers that check everything instead of a sample: every customer call, every review, every tender document. Your specialists then focus on the cases that matter.

MEET THE CO-WORKERS

Nadia

AI Quality and Compliance Auditor

Transcribes and scores every customer call overnight against your script, strips out card details and reports to each manager by 7am.

For contact centres, banks, insurers, clinics and multi-outlet service businesses.

Hafiz

AI Bid Analyst

Collects tenders and RFPs, reads every document in the pack, screens out what you cannot win and ranks the rest by morning.

For construction, engineering and MEP contractors, IT services firms and any business that bids for work.

WHAT THIS CHAPTER'S CO-WORKERS DELIVER

100%
of customer calls audited, up from under 10%

100%
of spoken card details redacted

200 pages
of tender pack condensed into one record

WHO BUYS THIS

Compliance, quality and risk managers who can only sample a fraction of what they are responsible for, and bid managers whose teams spend days reading tenders they were never eligible to win. These co-workers give full coverage and leave the judgment calls to your specialists.

CHAPTER 5 · SKILLS MENU

What the risk and compliance co-workers can take on

Nadia covers conversations and customer feedback; Hafiz covers documents and tenders. Both keep a full audit trail of what they checked and why.

Call quality audit — Nadia

Transcribes every recorded customer call and scores it against your own rubric, such as greeting, discovery, offer and close.

100% of calls audited nightly

Sensitive data redaction — Nadia

Finds spoken card numbers and security codes and removes them from the audio and transcript before anything else sees them.

100% of card details redacted

Script and disclosure checks — Nadia

Flags calls where required disclosures, consent wording or key steps were missed, by agent and by outlet.

Every call checked, not a sample

Agent coaching insights — Nadia

Matches every call to the right agent, even with nicknames or misheard names, and highlights coaching needs by person.

Scores attributed to the right person

Daily manager reports — Nadia

Sends each manager a 7am summary: calls handled, calls audited, compliance flags and average scores, with links to recordings.

Reports in the inbox by 7:00am

Review and feedback monitoring — Nadia

Checks reviews across outlets every few hours, replies with approved wording and escalates negative feedback.

Zero missed reviews; replies within 4 hours

Tender monitoring — Hafiz

Collects new public tenders and private RFPs that match your trades, values and locations every day.

Every relevant tender captured

Tender pack reading — Hafiz

Downloads and reads every document in the pack, including drawings lists, specifications and conditions, into one searchable record.

200 pages to one record; 35+ fields filled

Go or no-go screening — Hafiz

Screens each opportunity against your legal, financial and capability limits before anyone spends time on it.

6 categories of hard disqualifier checked first

Bid shortlist and handover — Hafiz

Ranks the remaining opportunities, pushes them into your CRM or project tool and assigns an owner.

A ranked shortlist every morning

DEEP DIVE · NADIA · AI QUALITY AND COMPLIANCE AUDITOR

Every call audited, every night

Nadia listens to every customer call your team made yesterday, removes sensitive card data, scores each call against your standards and has the results in every manager's inbox by 7am.

THE PROBLEM TODAY

Under 10%
of calls ever reviewed

Exposed
card details sitting in recordings

Days
before managers see what went wrong

HOW NADIA DOES IT

1. 12:05am: collect
2. Filter
3. Redact
4. Transcribe and match
5. Score
6. Log
7. 7:00am: report

BEFORE AND AFTER	BEFORE	WITH NADIA
Calls audited	Under 10%	**100%, nightly**
Card details in recordings	Exposed	**100% redacted**
Time to manager report	Days	**By 7:00am next day**
Outlets in one view	Separate spreadsheets	**Every outlet, one dashboard**

DEEP DIVE · HAFIZ · AI BID ANALYST

Tender screening and go or no-go

Hafiz collects every relevant tender, reads the whole pack, screens out what you cannot legally or financially take on and gives your team a ranked shortlist each morning.

THE PROBLEM TODAY

200+ pages
in a typical tender pack

Days
of reading before a go or no-go

Missed
opportunities in the noise

HOW HAFIZ DOES IT

1. Collect
2. Read the pack
3. Extract the facts
4. Screen hard disqualifiers
5. Score the rest
6. Shortlist and assign

BEFORE AND AFTER	BEFORE	WITH HAFIZ
Pages read per tender	200+ by hand	**One summary record**
Data fields captured	Inconsistent	**35+ automatically**
Reading of ineligible bids	Days a month	**Zero**
Shortlist	When someone has time	**Every morning**

CHAPTER 6

Executive

A co-worker that gives leaders back their hours: inbox handled, meetings summarised, research done and briefings ready before the day starts.

MEET THE CO-WORKERS

Olivia

AI Executive Assistant

Sorts your inbox and drafts replies in your voice, turns meetings into actions and answers research questions with sources.

For CEOs, partners, directors and the busy professional teams around them.

WHAT THIS CHAPTER'S CO-WORKER DELIVERS

3 h to 35 min
of email handling a day

90%
less time spent on research

95%
less time spent transcribing

WHO BUYS THIS

Founders, CEOs, managing partners and senior leaders whose days disappear into email, meetings and reading, and the executive assistants and chiefs of staff who support them. Olivia makes a strong assistant more productive; she does not replace one.

CHAPTER 6 · SKILLS MENU

What the executive co-worker can take on

Olivia works inside the tools leaders already live in: Outlook, Teams, Gmail and Slack. Every action she takes on your behalf can require your approval.

Inbox triage — Olivia

Classifies every incoming email by priority and topic, files the routine and surfaces what needs you.

95% fewer missed important emails

Draft replies in your voice — Olivia

Prepares replies using your past emails and business knowledge, saved as drafts for one-click review and send.

90% faster response times

Routine auto-replies — Olivia

Answers routine enquiries in the original thread within 30 seconds, around the clock, for categories you approve.

7.5 hours a week reclaimed

Meeting notes and actions — Olivia

Transcribes recordings, writes an executive summary with decisions and action items, and sends it to attendees.

95% less transcription time

Research briefings — Olivia

Answers research questions with current, sourced briefings and stores them in a knowledge base for the team to reuse.

15 hours to 90 minutes a week

News and market monitoring — Olivia

Watches the topics, competitors and clients you care about and sends a short daily digest.

One digest instead of hours of reading

Video and webinar summaries — Olivia

Turns long videos and webinars into a written summary and a 2 to 5 minute audio briefing.

10x more content covered

Document digest — Olivia

Reads board papers, reports and long documents and produces summaries, key risks and questions to ask.

Hours of reading cut to minutes

Daily briefing — Olivia

Sends a one-page morning brief: today's meetings with context, priority emails and open actions.

Every day starts prepared

Follow-up tracking — Olivia

Tracks promises made in email and meetings and reminds you, or the owner, before they are due.

Fewer dropped commitments

DEEP DIVE · OLIVIA · AI EXECUTIVE ASSISTANT

An inbox that runs itself

Olivia reads every email as it arrives, files the routine, drafts replies to the rest in your voice and leaves you a short list of what truly needs you.

THE PROBLEM TODAY

3 h	Buried	Slow
a day spent on email	important messages	replies to clients and partners

HOW OLIVIA DOES IT

1. Read
2. Classify
3. Draft
4. Save for review
5. Auto-reply where allowed
6. File and remind

BEFORE AND AFTER	BEFORE	WITH OLIVIA
Daily email time	3 hours	**35 minutes**
Response time	Hours	**90% faster**
Missed important emails	Regular	**95% fewer**
Routine replies	Typed every time	**Within 30 seconds**

DEEP DIVE · OLIVIA · AI EXECUTIVE ASSISTANT

Research and briefings on demand

Ask Olivia a question in chat, by text or voice, and she returns a sourced briefing in minutes, then keeps it in a shared knowledge base so the next person gets the answer instantly.

THE PROBLEM TODAY

15 h	Repeated	Scattered
a week spent on research	research on the same topics	findings in personal folders

HOW OLIVIA DOES IT

1. Ask
2. Check the knowledge base
3. Research
4. Write the briefing
5. Deliver
6. Store

BEFORE AND AFTER	BEFORE	WITH OLIVIA
Weekly research time	15 hours	**90 minutes**
Duplicate research	Common	**85% less**
Decision-making speed	Baseline	**80% faster access to intelligence**
Where findings live	Personal folders	**One shared knowledge base**

GETTING STARTED

Begin with a free AI Workforce Assessment

The fastest way to see what an AI co-worker can do for you is to look at your own work. In the assessment we review your workflows and systems with your team and show where a co-worker will pay back fastest.

What you get from the assessment

- A map of your highest-volume, most repetitive workflows
- An estimate of hours and cost each co-worker could free up
- A recommended first co-worker and rollout plan
- The controls and approvals we would put in place

What we need from you

- A short discovery session with the process owner
- Read access to the systems involved, or sample exports
- Examples of real work: past calls, emails, invoices or documents
- Your rules: scripts, approval limits and what is off limits
- A named owner on your side for the co-worker

MORE DETAIL IN YOUR ASSESSMENT

This catalogue shows what each co-worker does and the results it delivers. The full deployment detail for your workflows, including the controls you keep, how exceptions are handled and a rollout plan, is worked through with your team in the assessment.

Working with AI, not around it

Every Kydon AI co-worker comes with support for your team to learn how to work alongside it. Your people stay in charge of the judgment calls; the co-worker handles the routine.

Book your assessment: contact@kydongrp.com

Important information. The results, figures and timeframes in this catalogue are typical outcomes from AI co-worker deployments and are a guide only. Actual results depend on your volumes, systems, data quality and processes, and are not guaranteed. The capabilities, integrations, controls and timeframes for your organisation are confirmed during the assessment and set out in your proposal. AI co-workers operate within the controls and approvals you set, and decisions about your business remain with your people. Third-party product and platform names are trademarks of their owners, used for identification only, and do not imply endorsement. This catalogue is general information, not legal, financial or other professional advice.
